

SHWETA JAIN

Franklin, WI • jainshweta2015@gmail.com • 262-212-5755

PROFESSIONAL SUMMARY

Educator and curriculum developer transitioning into instructional design, with 8+ years of experience designing learner-centered instruction, assessments, and interactive learning experiences. Hands-on experience developing **eLearning and scenario-based simulations in Articulate Storyline 360** and creating interactive courses in Rise 360. Skilled at simplifying complex information, designing engaging learning experiences, and using data to identify learner needs. Master of Science in Chemistry and Google Data Analytics Certificate.

INSTRUCTIONAL DESIGN PORTFOLIO & PROJECTS

AssureGuard Insurance Training Simulation | Articulate Storyline 360

Independent Instructional Design Portfolio Project

- Designed a scenario-based eLearning simulation centered on an insurance customer-service workflow.
- Created learning objectives and structured the experience around authentic learner decisions and application of information.
- Developed interactive screens, clickable elements, states, triggers, feedback layers, navigation, and decision-based activities in **Articulate Storyline 360**.
- Designed learner feedback to reinforce correct decisions and guide learners when additional review is needed.
- Created a realistic software-training environment requiring learners to locate and verify customer and policy information.
- Tested interactions and revised the course to improve usability, learner flow, and instructional clarity.

Lab Safety: Chemical Safety Basics | Articulate Rise 360

Independent Instructional Design Portfolio Project

- Designed an interactive microlearning course focused on chemical spill and exposure response procedures.
- Used **Articulate Rise 360 and its AI-powered development tools** to support course content and learning experience development.
- Structured content into short, focused learning sections with instructional text, interactive activities, and knowledge checks.
- Developed scenario-based assessment questions requiring learners to select the appropriate response to a chemical exposure.
- Incorporated immediate feedback and learner-controlled navigation to reinforce safe decision-making.

Science Curriculum & Learning Design Projects

- Designed learning experiences incorporating objectives, instructional content, guided practice, hands-on activities, authentic assessments, and feedback.
- Transformed complex scientific concepts into accessible learning experiences using visual models, simulations, case studies, and real-world applications.
- Used learner-performance data to identify learning gaps and modify instructional strategies.

PROFESSIONAL EXPERIENCE

High School Chemistry & Horticulture Teacher - Case High School

- Designed and delivered standards-aligned learning experiences using demonstrations, hands-on activities, technology, and real-world applications.
- Developed instructional materials, activities, and assessments aligned with defined learning objectives.
- Used learner-performance data to identify gaps and adjust instruction.

High School Biology Teacher - Dover High School | 2024–Present

- Designed student-centered Biology curriculum aligned with NGSS and Wisconsin State Standards.
- Developed inquiry-based activities, authentic performance assessments, case studies, and simulations to promote application of knowledge.
- Increased student engagement by 15% through inquiry-based instruction and authentic performance assessments.
- Translated complex scientific concepts into structured learning experiences using visual models, technology, demonstrations, and hands-on activities.
- Monitored learner performance and used assessment data to modify instruction and provide targeted support.

Teacher - Atlas Preparatory Academy | 2022–2024

- Designed differentiated learning experiences for diverse learners, contributing to a 13% increase in mastery.
- Developed project-based learning activities promoting critical thinking, collaboration, problem-solving, and application of knowledge.
- Created instructional materials and assessments aligned with learning goals and learner needs.
- Used learner-performance data to monitor progress and adjust instructional strategies.

Science Educator - National Convent School

- Designed interactive science lessons incorporating visual models, hands-on activities, demonstrations, and real-world applications.

- Improved comprehension by 14% through visual and experiential learning strategies.
- Developed instructional materials and assessments to reinforce learning objectives.

ADDITIONAL TEACHING EXPERIENCE

Summer School Teacher - Atlas Preparatory Academy

Science Teacher - Elevate K12 (Virtual)

Teacher - Seton Catholic Schools

Teacher - Vibgyor High

Science Teacher - Mastermind Classes

INSTRUCTIONAL DESIGN & TECHNICAL SKILLS

Instructional Design: Learning Objectives • Learner-Centered Design • Scenario-Based Learning • eLearning • Simulations • Assessments • Feedback Design • Curriculum Development • Storyboarding • Differentiated Learning

Technology: Articulate Storyline 360 • Interactive eLearning Development • Google Workspace • Data Analysis

Content Development: Research • Writing & Editing • Simplifying Complex Information • Visual Learning • Interactive Activities • Performance Assessment

Other: NGSS & Wisconsin State Standards • Data-Informed Instruction • Cross-Functional Collaboration • Virtual Instruction

EDUCATION & CREDENTIALS

Master of Science (Chemistry) — Banasthali Vidyapith, Jaipur

Bachelor of Education (B.Ed.) — Jiwaji University, Gwalior

Bachelor of Science (B.Sc.) — Jiwaji University, Gwalior

Google Data Analytics Certificate

Wisconsin Teaching License: Biology, Chemistry
